Palantir

Forward Deployed Software Engineer, New Grad - US Government

Washington, D.C.

Delta / Full-Time / On-Site

A World-Changing Company

Palantir builds the world's leading software for data-driven decisions and operations. By bringing the right data to the people who need it, our platforms empower our partners to develop lifesaving drugs, forecast supply chain disruptions, locate missing children, and more.

The Role

Forward Deployed Software Engineers (FDSEs) work directly with customers to quickly understand their greatest problems and design and implement solutions to use data against them. Our customers rely on Palantir's platforms for some of their most critical operations, and projects often start with an open ended question like "How do we evaluate wildfire risk and optimize a power grid as a result" or "How do we quickly assess our food supply chain and modify it to deliver life saving assistance on time?" As an FDSE, you'll apply your problem solving ability, creativity, and technical skills to help organizations use their data to drive a real impact in the world. You'll have the opportunity to gain rare insight into and contribute to some of the world's most important industries and institutions.

Core Responsibilities

As an FDSE your responsibilities look similar to those of a startup CTO. You'll work in small teams with minimal supervision and own end-to-end execution of high stakes projects. Your day might span discussing

architecture with fellow engineers, wrangling massive-scale data, coding a custom web app, speaking with customer executives, or establishing strategy for your team.

Our Principles

- Impact: We address meaningful and exciting projects that change the world for the better.
- Ownership: We see projects through from beginning to end, working through any obstacles we may encounter. We trust each other to effectively handle time and priorities and give people the space to think for themselves.
- Collaboration: We work internally with people from a variety of backgrounds — such as other FDSEs, product teams, and Deployment Strategists. We also work externally with our customers, often on site, to understand and tackle their problems.
- Growth: We believe experiential learning is one of the best teachers and encourage ourselves and our peers to seek new challenges and opportunities for growth, as well as find new ways to innovate and share knowledge.

What We Value

- Ability to continuously learn, work independently, and make decisions with minimal direction.
- Ability to collaborate in teams of technical and non-technical individuals, and comfortable working in a constantly evolving environment with dynamic objectives and iteration with users.
- An eagerness to creatively solve technical problems with data structures, storage systems, cloud infrastructure, front-end frameworks, and other technical tools.
- Interest in working with and using large scale data to solve valuable business problems.
- Willingness and interest to travel as needed to client sites. Ability to travel 25-50% preferred, but requirements vary by team and location.

What We Require

- Active US Security clearance or eligibility and willingness to obtain a US Security clearance.
- Engineering background, preferred in fields such as Computer Science, Mathematics, Software Engineering, Physics, and Data Science.

- Proficiency with one or more programming languages, such as Python, Java, C++, TypeScript/JavaScript, or similar.

To apply, please include the following:

- An updated resume / CV - please do so in PDF format.
- Thoughtful responses to our application questions.

Salary

The estimated salary range for this position is estimated to be $135,000 - $145,000/year. Total compensation for this position may also include Restricted Stock units, sign-on bonus and other potential future incentives. Further note that total compensation for this position will be determined by each individual's relevant qualifications, work experience, skills, and other factors. This estimate excludes the value of any potential sign-on bonus; the value of any benefits offered; and the potential future value of any long-term incentives.

Our benefits aim to promote health and wellbeing across all areas of Palantirians' lives. We work to continuously improve our offerings and listen to our community as we design and update them. The list below details our available benefits and some of the perks that can be enjoyed as an employee of Palantir Technologies.

- Employees (and their eligible dependents) can enroll in medical, dental, and vision insurance as well as voluntary life insurance
- Employees are automatically covered by Palantir's basic life, AD&D and disability insurance
- Commuter benefits
- Relocation assistance
- Take what you need paid time off, not accrual based
- 2 weeks paid time off built into the end of each year (subject to team and business needs)
- 10 paid holidays throughout the calendar year
- Supportive leave of absence program including time off for military service and medical events
- Paid leave for new parents and subsidized back-up care for all parents

- Fertility and family building benefits including but not limited to adoption, surrogacy, and preservation
- Stipend to help with expenses that come with a new child
- Employees can enroll in Palantir's 401k plan

Life at Palantir

We want every Palantirian to achieve their best outcomes, that's why we celebrate individuals' strengths, skills, and interests, from your first interview to your longterm growth, rather than rely on traditional career ladders. Paying attention to the needs of our community enables us to optimize our opportunities to grow and helps ensure many pathways to success at Palantir. Promoting health and well-being across all areas of Palantirians' lives is just one of the ways we're investing in our community. Learn more at Life at Palantir and note that our offerings may vary by region.

In keeping consistent with Palantir's values and culture, we believe employees are "better together" and in-person work affords the opportunity for more creative outcomes. Therefore, we encourage employees to work from our offices to foster connectivity and innovation. Many teams do offer hybrid options (WFH a day or two a week), allowing our employees to strike the right trade-off for their personal productivity. Based on business need, there are a few roles that allow for "Remote" work on an exceptional basis. If you are applying for one of these roles, you must work from the state in which you are employed. If the posting is specified as Onsite, you are required to work from an office.

If you want to empower the world's most important institutions, you belong here. Palantir values excellence regardless of background. We are proud to be an Equal Opportunity Employer for all, including but not limited to Veterans and those with disabilities. Palantir is committed to making the application and hiring process accessible to everyone and will provide a reasonable accommodation for those living with a disability. If you need an accommodation for the application or hiring process, please reach out and let us know how we can help.

Please note that you will never be asked to submit a payment or share financial information to participate in our interview process. If you suspect that you've been contacted by a scammer, we recommend you cease all communication with the individual and consider reporting them to the relevant authorities, such as the US FBI Internet Crime Complaint Center (IC3).

If you would like to understand more about how your personal data will be processed by Palantir, please see our Privacy Policy.
